Alkali In Soap Bad for the Hair

Scalp should be used very carefully, if you want to keep your hair looking the best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle and ruins it. The best thing for steady use is Mulsated soap, not shampoo, which is pure and glycerine, and is better than anything else you can use. One or two transparent will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich creamy lather, which rinses out easily, leaving your hair soft and shiny, free from dirt and excessive oil. The hair shines naturally and evenly, and it leaves the scalp healthy and free from itching, dandruff, itching, itching and even itching. You can get Mulsated soap at any drug store or any pharmacy or by mail. Write to A. O. Bliss, 1000 1/2 Broadway, New York, and a few others will supply exact members of the Society for months.
